MARINE COATINGS

Since its establishment in 1994, UTOP has specialized in the marine coatings, continuously focusing on the research and development of safe and environmentally friendly products. UTOP is able to provide customers with high solids and solvent-free products , complying with the IMO regulations, as well as anti-fouling paints with TBT free & Cybutryne free , and provide long lasting protection solutions for all types of ships and offshores. It realizes energy saving and emission reduction of ships, extends maintenance interval, reduces fuel consumption, and reduces operational costs for customers.
